

The perfect treatment for a new client or someone who wants a lunch time facial and is short on time. Introducing your clients to the Stimulysin[®] Pro Lift allows them to gain an understanding of how and why it works. After the treatment, they will fully understand Interval Treatment Technology[®] and its unique application schedule from which maximum results are achieved. This take-home kit targets problematic areas, specifically concentrating on pigmentation and environmentally damaged skin. The slow release, Vitamin C complex works without crossing the threshold of acute irritation. The first treatment is done **in service** and the other 3 are completed **at home**, applied at one week intervals.

Customizable for any client, any skin type. No contraindications.

Results vary from client to client but one can expect little-to-no down time. Redness and sensitivity can occur, and a small percentage may experience slight flaking, with potentially more intense flaking around the mouth, lips, and nose.

NOTE: If minor irritation or itching occur, it can be treated with the **VA Recovery Cream** or OTC hydrocortisone cream.

How it works: A two-step approach that utilizes SERT: Selective Enzyme Release Technology[®] to deliver key actives that correct aging skin. This proprietary system delivers the highest levels of aqueous and lipid bioactives for rapid penetration across all cellular levels, with maximum results for a smoother, firmer, more youthful skin appearance.

Benefits:

- Eliminates appearance of fine lines and wrinkles.
- Improves skin tone and elasticity.
- Produces smoother skin.
- Diminishes appearance of age spots.
- Revitalizes and re-energizes skin.

DIRECTIONS FOR USE

PREP PROTOCOL

Step 1 Cleanse:

- Cleanse the face with **VA Daily Probiotic Cleanser**.
- Perform gentle cleansing massage.
- Use steam towel or warm towel to remove thoroughly.

Step 2 Exfoliate:

- Using **VA Probiotic Enzyme Exfoliator** - apply to wet face.
- Massage gently for 3-5 minutes.
- Allow to process 5 minutes.
- Use steam towel or warm towel to remove.

Step 3 Apply Occlusive:

- Apply product to mask off the corners of the eyes, nose and lips.

TREATMENT PROTOCOL

Step 4 Apply VA Pro A Lift:

- Dispense vial on face.
- Massage with fingertips for 1 to 3 minutes until absorbed.

NOTE: Do not proceed to step 5 till step 4 has completely absorbed into the skin.

Step 5 Apply VA Pro A Booster:

- Dispense vial on top of Lift product covering the same area.
- Massage in thoroughly with fingertips for 1 to 3 minutes.

Step 6 Scalp Massage (Optional)

CLOSING

Step 7 Remove Occlusive:

- Gently remove occlusive product from the corners of the eyes, nose and lip area.
- Do **NOT** remove treatment.

Step 8 Optional:

- Apply **VA Daily Essential Hydrator**, if needed.

Step 9 Apply TINTsmart SPF 35:

- Apply before leaving spa.

Step 10 Optional Daily Regimen:

- Recommend VA home care daily regimen.

Step 11 Remaining Pro A Lift treatments:

- Make sure customer is educated on how and when to use remaining treatments.
- Send customer home with kit.

NOTICE AND DISCLAIMER:

STIMULYSIN[®] LIFTS ARE NOT INTENDED FOR, NOR SHOULD THEY BE USED BEFORE, WITH, OR IMMEDIATELY AFTER, ANY MECHANICAL MANIPULATION OF THE SKIN SUCH AS, BUT NOT LIMITED TO, MICRO-NEEDLING, DERMA-PLANE OR MICRO-DERMABRASION. SUCH USE MAY CONTRIBUTE TO SIGNIFICANT IRRITATION OF THE SKIN AND POTENTIALLY LEAD TO MODERATE TO SEVERE DERMATITIS OR OTHER ADVERSE REACTIONS. ANY SUCH USE SHALL VOID ALL WARRANTIES, EXPRESS OR IMPLIED, FOR THE PRODUCT AND IN SUCH EVENT, OBI AND ADVANCED SKINCARE DISTRIBUTORS DISCLAIM ANY LIABILITY FOR INJURIES OR DAMAGES ARISING OUT OF OR IN CONNECTION WITH SAID USE.
